# Report of the Mayor

To the Citizens of the City of Rutland:

I hereby submit, for your consideration, my fifth annual report as Mayor of the City of Rutland for the year ending December 31, 1923.

Through the fine co-operation of the City Council, we have tried to conduct the affairs of our city for the best interest of all concerned.

I doubt if the people of Rutland realize the increased amount of work in the different departments of our city, especially in the offices of the City Clerk, who also acts as Purchasing Agent, as well as in the offices of the City Treasurer and Public Works Department. We are not only doing the regular work of a city, but are really in the contracting and construction business and this makes a greater amount of work in all of these offices. Then, too, we have just gone on to the weekly payment plan. This makes more work and some extra expense, but we have felt for some time that this should be done, as we have had hard work at times to keep help, on this account.

You will notice by the Treasurer's report that the \$50,000 street improvement bonds, that were expended this last year were at 41/4% through the efforts of our Treasurer, and anyone in touch with the money market will consider same to be a pretty good deal and realize that our city must have a good rating in order to do that, as a number of places are paying as high as 51/2%.

The past year used up the \$50,000.00 balance of our first bond issue of \$200,000.00. This issue increased our bonded indebtedness \$50,000.00, but we have saved, through the

payments of bonds and sinking fund earnings \$41,787.39, making the net increase in our bonded debt \$8,212.61, as shown by the following figures taken from the report of the Treasurer. This is made up as follows:

Total bonded debt  Less sinking fund, water \$97,034 61  Less sinking fund, general 343,429 98		00
	440,464	59
Net bonded debt Dec. 31, 1923 Net bonded debt Dec. 31, 1922	430,535 422,322	
Net increase in bonded debt		
The following statement shows how increase	was mad	le:
Street improvement bonds 1923 issue	\$50,000	00
637 paid from general acct 10,000 00 Sinking fund earnings 17,787 39		
	41,787	39
	\$8,212	61

While we were not able to close our books with as large a cash balance on hand as last year, we have lived within our means. The extra expense was brought about by the large amount of work we have been required to do because of the number of new houses and new streets that required sewer and water, addition to City Hall, increase in our Police Department, Police Signal System, Motor Cycle, increase in salaries in the different departments, some new machinery for crushing plant, loading machine and tractor.

We also have on hand quite a lot of road material that was bought and paid for this last season. That will be used on next season's work, as will be shown by the report of the Commissioner of Public Works. We have a cash balance on hand of \$13,409.99 and, when you read the report of our Treasurer, I trust you will feel that the money has been well expended.

We have also paid out of this year's business an unsettled account of Linberg & Street, also the guarantee money that was held back with these contractors and the Hassam Paving Co. on the South Main St. and Strongs Ave. contract.

### PUBLIC WORKS DEPARTMENT

This department, under the supervision of Joseph P. Feeley, has done a large amount of work, including the paving of Main St. from city line on the North to Madison St., Grove St. paving and sidewalks on both sides of street. The City Hall addition, to be used for garage, repair shop and storage is something that was very much needed, as well as covering up an old dumping ground that has been an eye-sore for years.

The engineering department has been working on plans of our sewer and water system and, when completed, will show the conditions as they are at present and what will be needed in the future, as our sewer system is inadequate and sooner or later, we will be obliged to have more water storage and larger or additional mains from the reservoirs.

The department has also just completed a survey of our water shed and a complete map of same is on file in this office, giving a list of the properties that have been purchased by the city, comprising 1500 acres in all.

The cost accounting and records of the different work that are kept in this office are most complete and a credit to this, or any other city, and is doing business on business principles.

I think the people will agree with me, that the widening of Grove St., by this department, was well worth the money and one of the best things that the city ever did.

CITY OF RUTLAND

We have spent a lot of money on sewer manholes and receiving basins, something that was very much needed, and there are still a good many more to be installed.

We have resurfaced quite a few streets about the city with gravel and crushed stone taken from the excavation on Main St.

We have several bridges that need attention and sooner or later, there will have to be considerable money spent on them in order to take care of the heavy loads they are subjected to, at the present time. We feel that some of these bridges should be repaired with as little expense as possible for the time being and the money spent on River St. Bridge, this being the most essential and in the worst condition. This department is working now on plans for a type of concrete construction arranged in such a way, that one section at a time can be built a year and after two or three years, the bridge could be completed along these lines and the expense would not come out of any one year's appropriation.

I am in accord with the recommendation of Mr. Feeley as to the erection of a Power house and powder magazine at our crushing plant, as we have quite a valuable lot of machinery at this plant and, if destroyed by fire or otherwise, would cause quite a loss to the city.

Again I feel, after the work that has been accomplished this year, that we have saved quite a sum of money by doing our own work and doing it with our own people. I will not go into details of the work in this department, as it will be shown by the Commissioner of Public Works.

### WATER DEPARTMENT

This department, under the supervision of Francis Tracy, has been well taken care of. There have been several new hydrants installed, new mains on several new streets, some of these costing quite a sum of money on account of rock excavation, new services on Main St., new main on Merchants Row preparatory to paving in the spring.

We have set out this last year about eighty thousand trees on our water shed, and I trust that this work will continue.

### DEPARTMENT OF PUBLIC SAFETY

This department in charge of Commissioner Fred C. Roberts, who is very much interested in both departments, has been well taken care of.

The Fire Department has had a busy year answering 157 alarms, the greatest number in its history with a total fire loss of \$57,533.88.

This department in charge of Chief John P. Reedy and his assistants have done efficient work and we are proud of them.

The Police Department, under Chief E. H. Lawson, has been well handled and especially the traffic business, which is increasing every year.

The Motor Cycle and Police Signal System are two additions, that were very much needed.

### DEPARTMENT OF CHARITIES AND CORRECTIONS

This department, in charge of Mr. and Mrs. Hickey, has been well handled and the money appropriated well spent.

### MEMORIAL HALL

By vote of the City Council, the appropriation to the Library was increased \$500.00, making \$4,500.00 and this increase was very much needed by the ladies in charge. We hope that some day the people of Rutland may have a library building that is adapted for a library.

#### CONCLUSION

In conclusion, I desire to express my appreciation to the Honorable Board of Aldermen for their co-operation in conducting the affairs of our city and friendly relations that have existed. To the Treasurer of the city, City Clerk, the heads of the different departments, as well as to the different foremen and the men connected with them, I extend my gratitude and thanks for all their assistance.

Respectfully submitted,

JAMES C. DUNN,

Mayor.

## Report of the Sinking Fund Commissioners

January 1st, 1924

To the Honorable Council of the City of Rutland:

Your commissioners have the honor to report the following changes in the City Sinking Fund during the past year and the condition of the fund at this date, viz.:

Water		General		Total	
\$93,006	75	\$317,670	45	\$410,677	20

Sinking Fund Commissioners.

# Report of the Commissioner of Public Works

To the Honorable City Council:

Gentlemen:—In accordance with the provisions of the City Charter, I submit herewith, the annual report of the Commissioner of Public Works, for the year ending December 31, 1923.

#### ORGANIZATION OF THE PUBLIC WORKS DEPARTMENT

Office Force:

R. H. Royce, Engineer,

F. L. Rice, Engineer,

C. C. Bentley, Clerk.

Frank Tracy, Superintendent of Water, James McLaughlin, Foreman of Streets and Sewers, Roy Leonard, Foreman at Crushing Plant, John Conner, Foreman of Bond Issue Construction.

#### BOND DEPARTMENT

The Department of Public Works surveyed and supervised the construction of all work completed under the paving bonds issued for 1923, also the maintenance of all work completed under the bonds issued in 1920, 1921, 1922 and 1923. This maintenance consisted of cleaning and filling all joints and shrinkage cracks with a hot bituminous binder.

North Main street was paved, from the City Line at Mill Village, a distance of 6500 linear feet to Temple street, with cement concrete, 1-2-4 mix, 7-in. uniform thickness, reinforced with 4 steel bars 1/8-in, in diameter running longitudinally and 2 3/4-in. deformed bars laid transversely every 50 linear feet. This pavement was finished 18 feet wide with a four foot shoulder.

At the point of beginning near the City Line a large quantity of ledge was removed, the grade made uniform, and 500 feet of fill was made in the first 1200 feet. From Field avenue southerly all water services, drainage and sewer systems were either renewed, or the old service replaced, as their condition warranted. The section between High street and Clinton avenue has been a sea of mud and nearly impassable for years. This section was properly drained and a crushed stone base built. One feature that caused difficulty was the outlet to the sewer running westerly on Clinton avenue at Main street. The sewer ran into a large boulder and stopped, causing the sewage to penetrate through the ground and damage the road bed. Still another condition was 300 lineal feet of 12 in. sewer running north from Temple street about 3 feet below our present street grade, to a dead end at another large boulder. A condition such as this is enough to break

From North street to Temple street new catch basins and up any road bed. manholes were built, and all sewers connected to our sewer system. No trouble is anticipated for the future in this section. Work on this project was started April 2, 1923 and completed September 4, 1923. The actual working days were 114. May 11, 1923 we had to shift our crew of men and mixer to the Grove street widening job and did not resume work on Main street until June 14, 1923. The labor situation was very unsatisfactory from April to July of 1923, and the type of work performed was not altogether pleasing to this office. The labor market was unsettled and men were going from one job to another, outside firms were bidding for local labor and at one time we had to discontinue our operations due to indifferent work of labor, but after June 15, 1923 the labor situation improved, and throughout the summer months. a number of high school and college boys formed the greater part of the organization.

The section from Temple street southerly to Madison street was paved with cement concrete, specifications similar to the section previous. This pavement was 15 feet wide on each side of the Rutland Railway Light and Power Company track, which is located approximately in the center of the traveled way. No work was done on the track section other than to resurface with crushed stone, dust and screenings.

All the water services were renewed under the pavement and a complete survey was made of location for all pipes and valves. New services were built where needed, manholes constructed, and the old drainage system replaced with modern catch basins and catch basin tops. The new catch basin and manhole tops were designed by this office and built by the Lincoln Iron Works of Rutland. Construction was started August 1, 1923 at Temple street and extended southerly to Madison street a distance of 3400 lineal feet. The work was finished October 13, 1923, with a total of 521/2 working days.

The materials used on the North and South Main street project were all local except the cement and steel reinforcing. Sand was drawn from the Barker pit at Mendon and the stone from the City crushing plant on Pine Hill. The Atlas and Lehigh brands of cement were used, which was bought from local firms. Tabulation of work completed is as follows: and a comparison with last years prices shows a considerable increase in labor and material.

Main St., City Line to Temple St. 12,600 sq. yds. \$27,853.71 Main St., Temple St. to Madison St. 11,500 sq. yds. 23,995.15

> 24,100 \$51,848.86

Total amount of paving under the bond issues are as follows:

1920 contract work	11,991 sq. yds. 43,274 1,824 sq. yds. 3,67 21,384 sq. yds. 41,42 24,100 sq. yds. 51,84 2,733 sq. yds. 6,18	7.32 2.015 9.65 1.93 8.86 2.15 32.63 2.223
1920 1	-2 272 ag vds. \$196,4	26.49

73,372 sq. yds. \$196,426.49

We have on hand at the Post street yard 13,449 pounds of reinforcing steel at \$0.05	\$672.37 1,613.37
17,826 lineal feet expansion	\$2,285.74

All of this material will be utilized in the bond issue of 1924. It was voted by the Board of Aldermen and confirmed by His Honor, the Mayor, to use the 1924 money on Merchants Row, and due to the excessive amount of traffic on this street, this office deemed it advisable to construct all sewer, drainage and water works throughout the winter months. The public utilities companies are to follow the same procedure, and when the construction season opens in the spring of 1924 the work of paving will proceed rapidly. This move will, I think meet with the approval of the majority of citizens.

# STREET DEPARTMENT

In the spring all the streets in the city were shaped and scraped with our tractor and road machine. This outfit was a great improvement over the old way of scraping with horses. It was much quicker and less costly, and a first class job was accomplished. A large number of streets were resurfaced \*Grove street.

with gravel and crushed stone. A patrol man patched and maintained the waterbound macadam roads, with a cold patch standard emulsion cut back, and the results were very satisfactory. Standard No. 5 cold application of asphalt was applied to all streets that petitioned for such. This application was covered with sand immediately after the streets were oiled and at no time were any streets left uncovered for a longer period than two hours. The asphalt was applied with a power spreader furnished by the Standard Oil Company of Albany. N. Y. A slight increase in cost over 1922 was due to higher price of materials.

Water sprinkling was done in the business section with our horse drawn motor flusher.

Some calcium chloride was applied to streets that petitioned for this particular treatment, and the results were not satisfactory. After a rainfall the streets were muddy and very slippery, and the application appeared to lose its value as a dust layer within a few weeks of the time applied. The cost of calcium chloride and the No. 5 road asphalt was about the same, but the results were vastly different, the asphalt being, by far the better.

Snow removal was of considerable magnitude this year. We had a snow fall of 73.7 inches, divided into the different months as follows:

November, 1922	.3 inches
December, 1922	17.6 inches
January, 1923	24.1 inches
February, 1923	13.9 inches
March, 1923	17.9 inches

The snow was removed eight times from the business section and disposed of through the manhole into the 54-in. sewer on West street. Drifts, some of them being 11 feet in places were removed from the following streets: Merchants Row, Furnace street, Post street, Gleason Road, Park street, Field avenue, Temple street, Woodstock avenue, Harrington CITY OF RUTLAND

avenue, Stratton Road, Allen street, Killington avenue and

Altogether we had a busy winter and the money expended Curtis avenue. had to come from the street department as no special appropriation was made for snow removal.

### SIDEWALKS

A large amount of cement concrete sidewalks was constructed and a uniform grade established whereby when one section of sidewalk is built, a new section built at a later date will meet the established grade and eliminate the waves so common in existing concrete sidewalks.

Due to the large amount of snowfall 240 miles of side. walks were plowed and cleaned. One hundred and eighty miles of sidewalks were sanded. The cost of this work is deducted from the sidewalk funds, as no appropriation is made for cleaning sidewalks. In fact our City Ordinances require the property owners to remove the snow from the section of sidewalk directly in front of their property after each storm.

#### SEWERS

Our sewer system is our greatest problem and this year has seen the beginning of an adequate design to be followed for future development. A large amount of sewers were laid and a number of sections relaid. New manholes and catch basins were built. The residents of East street were troubled by the frequent backing up of the sewer in that street, and in some places the cellars and garages were completely flooded with sewage. This matter was brought to the attention of the Board of Aldermen and this office was directed to make such improvements as needed. A survey was made and a new lateral sewer designed. The old 8-in. sewer was removed, the line straightened, manholes and catchbasins installed and a 15-in, ackron tile sewer laid. I have received notification from the property owners that no more trouble has developed and none is expected.

111

On Jackson avenue a small stream drains the section directly north and passes through a box sewer about 24 inches square through the properties of Herman and Kiley, and crosses Jackson avenue through a stone culvert, thence it follows its original course to Moon Brook. During the summer season the stream dries up, but with the spring and fall rains, a large amount of water flows in the waterway. Due to some reason or other the box sewer on Kiley's and Herman's lands has been plugged and causes the brook to overflow across the lands of George A. Austin and others, and onto Jackson avenue, causing a very dangerous condition. Photographs are on file in the City Engineer's office showing the course of the brook after the box sewer was plugged. The Board of Aldermen have investigated the problem and consider it a matter that concerns the property owners, through whose lands the box sewer flows, and in my opinion the box sewer should be maintained by said property owners until such time as the City has a drainage system of sufficient size to take care of this overflow in rainy seasons.

The sewer on field avenue west of Lincoln Boulevard has caused this department much expense due to freezing. The sewer is laid only a few feet below the surface of the traveled way, and the sewage freezes in the line causing a condition that is unsanitary to the property owners in this section. It would be proper to relay this sewer at a greater depth and construct a manhole to care for trouble that exists in all sewers.

The trunk sewer along Baxter street will have to receive a concrete jacket as the arch has failed a number of times, due to the excessive strains from the street loads. This sewer is also near the surface of the ground, but a concrete jacket will protect it for a number of years and will prove much cheaper than relaying to a lower grade.

The Board of Aldermen requested the City Engineer to design a sewer system of the entire city to meet with its requirements for a number of years. This work has been under way and at this time a report for the Main System Drainage Area No. 1 is as follows:

Kutter's formula n=0.013 was used and an average rainfall of 34.27 inches assumed. The following table shows the amount of snow and rainfall each year from 1917. Total inches

ant of snow an	a rames	Snow	Total menes
Years 1917 1918 1919 1920 1921 1922 1923	Rain 24.07 31.63 33.33 32.24 25.50 32.06 29.55	44.0 53.3 36.3 82.0 42.8 59.2 73.10	29.57 36.75 36.28 38.97 28.05 34.83 35.63 240.08 34.27
Total inches Average in	ches	puted by c	onsidering the page

The population was computed by considering the past growth of the city. Designing a sewerage system involves a number of vital points: Whether it shall be collected by the separate or the combined system; the proper size and shape of each conduit; the location; depth and grade at which it is to be laid; also what appurtenances, such as manholes, catchbasins, etc. are necessary and where, and the details. In this system no manholes or basins will be designed as it is proper that the engineer in charge of construction, design his own inlets according to the topography of the ground at the period of construction. The system to be designed is known as the combined system, and the city divided into sections, the Main system, Moon and Mussey Brook system, and the West system. Each system is divided into drainage areas, each of which will be sewered by a small secondary system of its own. The effluents from the several

drainage areas will discharge into a common main sewer and be carried to a common outlet. A number of important matters to be investigated and data to be obtained in preparing the design are:

- 1. The point of discharge.
- 2. Design of outfall.
- 3. Rainfall and intensity of rainfall.
- 4. Amount of domestic and industrial sewage.
- 5. Runoff and underground flow of water.
- 6. Number, location, size and condition of existing sewers that might be used in the new system.
  - 7. Type of system, separate or combined.
- 8. Grades of the streets or other ground surface along the line of the proposed sewers.
  - 9. Size of sewer as affecting grade.

In this design each system of sewers consists of a main or trunk sewer, branch sewers and lateral sewers. A topographical survey of drainage area No. 1 has been completed. A combination of the old sewer system, using such of it as is available, and the new system is to be built as designated on the plan on file in this office.

The present system in Main system No. 1 shows no sewers on the following streets or sections of streets: Church street, Elm street, Williams street, Nichols street, Kingsley avenue, Lincoln Boulevard, Crescent street, proposed North street, Bellevue avenue, proposed Highland avenue, Park court and Jefferson street.

To rebuild this system as it should be, would require the following amount of pipe, without taking into consideration

CITY OF RUTLAND

that amount of pipe that might be salvaged from the present system.

tem.	7,545 feet
8 inch	a got foot
8 inch	7,885 feet
15 inch	2,660 feet
18 inch 20 inch	1,320 feet
20 inch	1,475 feet
42 inch	
40 1110	43,260 feet

A large portion of the old system should be utilized and construction planned to keep the cost of the system as reasonable as possible, and still follow the new design. It is very important that a plan of sewers be strictly adhered to as the life of the average sewer is from 30 to 50 years and the first cost, which takes into consideration the excavations is always a big item, whereas the difference in cost of the different size of sewer pipe is really very small, the cost of repairing mistakes and changing sizes of conduits is very costly.

The process of design is very slow as so much data has to be developed before the design may be put on plan. The work of designing the other drainage areas will be carried on as rapidly as our work will permit.

# REPORT OF THE ENGINEERING DEPARTMENT

This department designed and drew up specifications for the addition to the City Hall which is now under construction and nearly finished. The plans for this building include complete drainage, plumbing, lighting, heating, foundation, wall, framing, ornamental and roofing details, and all materials needed were determined and ordered before construction started in order to prevent any delays.

Pursuant to instructions received from the Board of Aldermen, a careful study and survey was made relative to the establishment of a Municipal Lighting and Power plant. This survey is summarized in a 36 page, typewritten report, which is on file in the City Engineer's office.

The new cement pavement this year was laid from the north limits of the city on North Main street to the head of Madison street on South Main street, a total distance of 9,814 linear feet, and the preliminary survey, design and supervision of construction was done by this office.

Considerable work was necessitated by the widening of Grove street, which was also accomplished this year.

In connection with this a diagram of proposed street renumbering, having Merchants Row start at State street and numbering thence southerly to Washington street was made.

A comprehensive topographical survey and map of the land deeded to the city by H. O. Carpenter and known as Pine Hill Park was completed this summer and shows the length and bearing of each line of the property, and a contour line for every 5 foot difference in elevation, as well as paths and old wood roads.

The oil applied on the streets this year was under the direct supervision of this department, and every effort was made to prevent this necessarily, objectional work from being more objectionable than it actually had to be. Every hard surface street that required sanding was sanded within an hour or two after it was oiled the full width, and there were gratifyingly few complaints this year.

Plans showing definite locations of all underground work, sewer and water lines laid this year have been made and placed on file.

While the water department records are in relatively good condition, more definite data is required to reduce the insurance rate in this city, and with that end in view, a recheck and card index location of all valves, hydrants, etc., as well as the details of the supply system are now being worked up and will soon be completed.

The line and grade for a considerable number of sewers has been given, which have been built, as well as several which have not, such as the proposed storm sewer on Killington avenue, Engrem avenue and others.

Seabury street which was originally laid out 50 feet wide, was reduced to 40 feet wide by the Board of Highway Commissioners, the south line remaining unchanged.

Plans were prepared for a proposed extension of the ornamental lighting system on West and Wales street.

With a view to laying out a comprehensive sewer plan for the entire city in order that future work may be done in conformity with a definite scheme, which will take care of ultimate development, and thereby do away with expensive relaying and changing. The city has been zoned with regards to the existing drainage systems, and at present preliminary plans embracing drainage area No. 1 Main Drainage System are completed. These plans show grade and size of pipe required and are based on mathematical formulae.

Besides the activities before mentioned the regular routine of the office has been carried out, which includes a system of cost accounting, tabulating the exact cost of each individual section of work in totals and in items, a record of the work done by each city employee for every hour is on file and the cost data available is of inestimable value for estimating future work.

Street lines have been given, sewers located, sidewalks laid out, and other miscellaneous work has filled the year.

This department also completed a survey of the water shed and reservoir in Mendon. Plans, tracings and notes are on file in this office.

#### CITY DUMP

Complaints from the residents in the vicinity of the City Dump, were received about existing conditions, and to remedy this nuisance a board fence 7 feet high with two entrance gates was erected. This fence was painted two coats of white. West's disinfectant was used each day and sprayed over the dump by the attendant. Regulations were printed for dumping of refuse and a copy posted at the City Dump reads as follows:

#### CITY OF RUTLAND DUMPING REGULATIONS

1. No dumping at City Dump on River street will be permitted except at the following hours:

A. M.—7.30 to 12.00 P. M.—1.00 to 4.30

- 2. No one will be allowed to carry away or scavenger any material from the dump at any time.
  - 3. Violation of these regulations will be punished.

#### J. P. FEELEY,

Commissioner of Public Works City of Rutland

## GROVE STREET WIDENING

The project was under way April 10, 1923, with the removal of 14 large trees, the concrete curb and gutter followed, and the relaying of cartracks, water, drainage, sewers, gas, telephone and ornamental lighting work progressed rapidly, so that on May 11, 1923, the 7-in. uniform concrete pavement of 1-2-4 mix was begun and finished July 2, 1923, with the exception of 20 cubic yards directly in front of the Marble Savings Bank Building which was not poured

until late in the fall, due to the construction of the bank. This work was greatly needed and the danger at the corner of State and Merchants Row is greatly reduced. The seas of mud, large holes and narrow roadway have gone forever. The grade of the east line of the street was lowered 24 inches to meet the new grade of the pavement, so that we have drainage from Maple street on Grove street to West street.

The committee appointed by the Board of Aldermen consisting of Mayor Dunn, City Attorney Kinney, Alderman Anthony, Harrison, Pratt and White, deserves full credit, as it was due to their untiring work and efforts that the Grove street widening was made possible.

#### REPORT ON MUNICIPAL LIGHTING PLANT

The Board of Aldermen appointed a committee consisting of Aldermen Pratt, Pike, Reardon and the City Engineer to investigate and report on the advisability of building, operating and maintaing a municipal electric lighting plant. A complete report, consisting of 36 pages of typewritten copy, is on file in the City Engineer's office.

#### POST STREET YARD

The city station at Post street has proved that the remodeling, building fence and grading has many advantages. We have had no destruction of city supplies and a supply of material may be stored in the station safely for future use. All our machinery and equipment was overhauled, repaired and painted.

#### PINE HILL QUARRY

All stone used by the Street, Water, Sewer and Bond departments was furnished from the City Quarry at Pine Hill. The plant has proved very satisfactory and the grade of stone quarried is of the best. A new compressor was installed, we now have air capacity to run two jack-hammers. The old compressor was sold and the value realized was

credited to the Street department. The crusher had a general overhauling and new parts installed. A small air hoist was purchased to operate the cars from the quarry to the crusher mouth and a considerable saving in time and labor has been realized over the old method of traction.

Our supplies for the year were contracted for in the early spring and a considerable amount of money was saved, purchasing by the wholesale method.

Quarry operations were shut down on November 1, 1923, and the crew transferred to the sewer department.

#### CITY HALL GARAGE

The plot of land south of the City Hall was considered an eye sore. The wooden buildings were in a dilapidated condition and unfit for storage of any kind. Our trucks and cars have been stored at private garages, throughout the winter months, entailing considerable expense. The Board of Aldermen directed that a suitable building be designed and erected to include storage room, garage repair shop and boiler room. Plans were submitted and approved and construction was started November 2, 1923, and the greater portion of the building will be completed February 1, 1924. The type of construction consists of concrete, steel and brick, with a frontage of 95 feet on Strongs avenue. The extreme southern portion of this lot was leased to Mr. A. W. McKee, with restrictions for conducting a lunch business for one year.

#### NEW STREETS

Kingsley Court was the only new street accepted and this was accepted by the Board of Street Commissioners with the understanding that a cement concrete pavement be constructed by the developers of the property and said pavement to extend northerly from the western end of Kingsley Court a specified distance, and thence easterly to Pine Street, the City to bear no part in the expense of said work.

#### CITY OF RUTLAND

# WORK PERFORMED FOR OTHER DEPARTMENTS

# Fire Station No. 2

A new concrete wash stand was designed and constructed at Fire Station No. 2 to replace the old wooden one. This stand is now carried on lally columns and I beams, with proper drainage to sewer.

# Fire Station No. 1

The air tanks that supply the fire whistle were lowered from their upright positions to a new concrete pit in the storage section of the new addition to the City Hall. This project required all new piping and great care in the moving of the tanks to the underground pit, which is 6 feet deep, 18 feet wide and 20 feet long, with drainage connection to sewer.

### Police Department

A number of traffic guides were made for this department and erected at points designated by the Commissioner of Public Safety.

#### Library

The flag pole was removed and a new base constructed. The pole was given a thorough overhauling and replaced with proper rope and pulleys.

# RE-NUMBERING MERCHANTS ROW

The Board of Aldermen requested a survey of Merchants Row from Strongs avenue to State street with proposed new numbering system. This work was completed and submitted to the Board for approval, but no action has been taken to date.

#### NEW EQUIPMENT

A small tractor was purchased and was used on the Street and Bond departments with excellent results.

A gasoline loading machine was purchased and used at the quarry, gravel pit and on the excavation of the bond issue construction. The old 8 x 8 compressor was sold and a new Sullivan 10 x 10 motor driven was installed at the crushing plant, thereby increasing the capacity of air so that now we can operate two jack hammers and have excess power. A small air hoist was purchased and installed at the crushing plant to haul the Kopple cars from the crusher to the quarry, eliminating hand labor. Two carbide lights were purchased for emergency night work, and have paid for themselves many times.

#### WATER DEPARTMENT

A survey of the watershed has been completed, and drawings and tracings placed on file in this office. A survey of location to show the reservoir and pipe line connecting the watershed with the city proper is also nearing completion.

A plan is on file in the City Engineer's Office showing, date of record, book and page, where recorded, etc.

The upkeep and improvements of the Water Department have been similar to the past three years.

All services on Merchants Row between West and State State streets have been relaid new. All valves or old abandoned connections were either repaired or replaced.

In conjunction with the bond issue paving project, all services on North and South Main streets, between Field avenue and Clover street were relaid. All valves or valve boxes were repaired or replaced by new ones. A 6-in. main on Norton Place was permanently connected with North Main street 12-in. main, with Smith bolted tee and valve. All other branch mains crossing Main street under cement were permanently taken care of, or provision made so that they can be connected later without cutting cement.

The 2-in, main crossing Otter Creek near Dorr Bridge was relaid for a distance of 175 feet. This was a rather difficult repair due to deep water in stream at this point and low banks, which required much pumping, and also a boulder stone fill on the south side of River street over main.

A 6-in, main extension was laid on Ives avenue, for a distance of 288 feet, to a point opposite the Root house. This trench was nearly all rock excavation.

A 6-in. main extension was made on Burnham avenue for a distance of 72 feet to a point opposite No. 45 Burnham avenue. This was rock excavation.

A 6-in, main on Charles street was extended 72 feet. This was 25% rock excavation.

The 6-in, main on East Washington was extended for a distance of 224 feet. This trench averaged 61/2 feet deep due to future necessity of cutting grade of street at this point.

A 6-in, main replacement and extension on Pine street to the intersections of Kingsley Court, a distance of 459 feet. This distance also includes work on Kingsley Court.

A new 6-in, main was laid on Seabury street from Grove street easterly for a distance of 436 feet. This trench was an average of 7 feet deep due to future necessity of cutting grade for street. A 6-in. main extension on Spruce street for a distance of 192 feet. Two feet of depth of the bottom of this trench was quick-sand clay, which had to be sheathed, and much pumping was necessary due to ground water.

A 10-in, main extension on Strongs avenue from the brick pavement to Washington street was laid to connect with 12-in. at the intersection of Washington street and Merchants Row. for a distance of 300 feet.

All mains were supplied with valves where necessary.

A new hydrant was set on Evergreen avenue at a point 500 feet north of State street and one at the intersection of Bellevue avenue and North street.

Broken hydrants or old hydrants were replaced as follows: at the intersection of Pine and Howe streets: at the head of Franklin street near railroad shops; at intersection of State and Grove streets; at intersection of Maple and Grove streets: at intersection of Williams and Elm streets, and at intersection of Strongs avenue and Clover street.

New services were laid, and many old services repaired. All necessary repairs and changes and installing of new meters, patrolling and testing of hydrants, patrolling mains to the City reservoir, inspection of valves, resetting of valve boxes and curb boxes are items of the general upkeep of the water department and were taken care of as promptly as possible.

The chlorination plant and the Ortho-Tolidine test at the reservoir have been very satisfactory and the general report of analyses made at the Laboratory of Hygiene at Burlington assures us of pure water.

Reforestration of the watershed was extended by the setting out of 80,000 evergreen trees.

The following tables show the expenditures in the Public Works Department for 1923.

#### RECOMMENDATIONS

That a new power house be constructed at Pine Hill quarry to properly house the valuable machinery now installed at the plant and a powder house be designed and erected that will be both fire and bullet proof, to store our supply of dynamite and caps, so that the hazard will be at a minimum. Buy and install two 10,000 gallon tanks to hold asphalt road material, so that we may have a supply on hand at all times throughout the summer months. This asphalt to be used in building our secondary road systems.

Survey all street lines, have same definitely defined, recorded and marked by plainly recognizable markers. At present many street lines are not recorded, their exact location is a matter of dispute, and the only data which might clean up the situation is often so contradictory as to be of no value. If the City should be surveyed and street lines be established, legally adopted and plainly marked, it would be money well spent.

Another source of expense is the present system of assessing for street oiling, which requires the property owners to pay one-third of the total cost of the oil applied in front of his or her property. This cost varies with the width of the traveled way, the amount of frontage, and the number of applications. This necessitates a great deal of time, computing each individual bill. The City of Burlington does this oiling by a general tax and this City would do well to investigate their method, thereby saving considerable work in this department and in the office of the City Treasurer.

The wooden bridges on North street and on Granger Street are in a dangerous condition and should be replaced with modern bridges designed to carry a 20 ton load.

This report closes a year of many needed improvements and it was successful, due to the cooperation of His Honor Mayor Dunn, the Honorable Board of Aldermen and the men who make up the personnel of the different departments. It is a great pleasure and source of satisfaction to know that everyone is working for the same goal; namely to make Rutland the best and most progressive City in Vermont.

JOSEPH P. FEELEY

Commissioner of Public Works.

# Report of the Commissioner of Public Safety

To the Honorable City Council:

I hereby submit my report as Commissioner of Public Safety, of the Fire and Police Departments for the year ending December 31, 1923.

The Fire Department is composed of the Chief Engineer, 1st Asst. Engineer, 2nd Asst. Engineer, eight regular firemen, 12 call men and 1 steamer engineer.

Five men with the Chief Engineer and the 1st Asst. Engineer are located in Station No. 1, and three regular men, one call man and the 2nd Asst. Engineer at Station No. 2.

The department answered the largest number of calls in its history, there being 157 alarms during the year, the total fire loss was \$55,152.93; \$44,156.26 of which was caused by the fire on April 1st, which destroyed the Marble City Mfg. Co. plant on Strongs Ave. The danger of combustible roofs was demonstrated on this occasion when the roofs of eleven buildings at considerable distance from the factory building were ignited by sparks, and that a much more serious loss was averted was due largely to the efficiency of the department, equipped with the motor pump which enabled them to keep the fire from spreading to the adjoining factories of the Rutland Sash & Door Co. and the Howe Scale Co.

In this connection I wish to again emphasize the value of a fire truck equipped with a pump and recommend that some action be taken to replace the truck which has been in use at Station No. 2 for nine years.

The weekly inspection of the business district by the Fire Marshal has been continued during the year, and the value of eliminating fire hazards has again been demonstrated.

One new fire alarm box was added during the year and two more will soon be installed.

An unusual expense was incurred during the Winter of 1922-23 by the extra heavy snow which necessitated the use of horses to be ready to haul the apparatus when called outside the main traveled streets.

An inventory of property and supplies on hand shows a total of \$38,212.75.

The expense for the year is as follows:

July 100 Total Control of the Contro			
Payroll	\$17,791	23	
Repairs and supplies	145	10	
Auto repairs and supplies	535	58	
New equipment	742	23	
Fuel	430	19	
Laundry, 'phone and sundries	110	97	
Light and power	192	40	
Insurance	100	0.0	
Team hire Winter '22-23	512	00	
Commissioner's salary	100	00	
	\$20,659	70	

#### POLICE DEPARTMENT

The Police Department is composed of a Chief and 12 regular men; two traffic men and a motorcycle policeman having been added during the year.

There were 232 arrests in 1923—109 for intoxication, 21 for violations of liquor laws, 54 for violations of traffic and auto regulation and 48 for other offenses. 203 people were given lodging.

During the year the Gamewell Police Signal system was installed and this department is now equipped with a system that is very efficient and can be expanded to meet the requirements of the city for many years to come.

The motorcycle which was added to the department has materially assisted us in regulating traffic, and has had a marked effect in stopping speeding, especially on the streets leading into the city. During the seven months it was used in 1923 the officer in charge drove 4281 miles and in addition to the moral effect of a motorcycle officer on our streets, stopped and warned many speeding drivers, drivers with defective lights, arrested 12 speeders who were fined, and

An inventory of property and supplies on hand totals \$6,403.00.

The expense of the year is as follows:

Payroll  New Gamewell Signal System  Repairs on old system  New equipment includes	\$16,911 59
Repaire on the mending motors	910
Telephone Commissioner's salary	1,315 44 452 83
***************************************	143 53 100 00

\$24,891 74

Respectfully submitted,

FRED C. ROBERTS,

Commissioner of Public Safety.

# Report of the City Attorney

To the Honorable City Council:

I herewith submit my report as City Attorney for the year ending December 31, 1923.

During the months of January, February and March, when the legislature was in session, the City Attorney made several trips to Montpelier to attend hearings before legislative committees with reference to the act authorizing the City of Rutland to operate electric and gas plants. This act was strenuously opposed by the Rutland Railway, Light & Power Company, but was eventually passed by both houses and approved on March 19, 1923. There is a referendum attached to the act which provides that it shall become effective whenever a majority of the legal voters of the City of Rutland, voting at any annual or special meeting, shall vote to accept its provisions.

About March 1, 1923, the Public Service Commission handed down their decision in the gas rate case, by which it reduced the gas rate 12.82%. This made a further reduction of about 10c. per thousand cubic feet of gas in addition to the reduction made by the Company after the hearings, and a total reduction of about 30c. per thousand cubic feet below the rate which the city claimed was unreasonable and excessive and which proceedings were instituted to reduce. On the basis of the consumption of gas in the city, as shown by the evidence before the commission, these reductions resulted in a saving to the consumers of gas in the city of between \$17,000 and \$18,000 per year.

During the month of April proceedings were instituted before the Board of Highway Commissioners to change the width of Seabury Street and the width of this street was changed by the Highway Commissioners in conformity with the prayer of the petition. Two suits were brought against the city during the year, one by Anson B. Hatch to recover for materials and labor furnished in connection with the construction of sidewalks in the city, and the other by John F. Smith to recover for the board of two men committed to the Rutland County Jail. The first suit mentioned was settled without trial and the other was tried before the City Court and is now pending in the Supreme Court on appeal. One criminal prosecution was brought for violation of the city ordinances. Several suits were instituted by the City Attorney in behalf of the city for collection of delinquent taxes.

During the year several insane paupers have been committed to the Brattleboro Retreat for treatment through the efforts of the Overseer of the Poor and the City Attorney, and the city thereby relieved from liability for their support.

Throughout the year the City Attorney has frequently been called upon to advise and assist various committees and officers of the city, and it has always been a privilege and a pleasure to render such assistance as was in his power.

Respectfully submitted,

CLAYTON H. KINNEY,

City Attorney.

# Report of Overseer of Poor

### To the Honorable City Council:

I herewith submit my report as Overseer of the Poor for the year ending December 31, 1923.

#### HELEN B. SMITH,

Acting Treasurer.

I have examined the above accounts and find them correct as stated. CORNELIA C. PERKINS,

Auditor.

## Report of the Board of School Commissioners

To the Mayor, City Council and Citizens of the City of Rutland:

The Board of School Commissioners herewith submits its report for the fiscal year ending December 31, 1923.

We are pleased to report that except for the inadequate housing facilities at the high school, our school system is in a most excellent condition. The past year has been one of steady forward progress in building up and strengthening the schools, and the increasing interest shown by our citizens in school affairs and particularly in getting into closer contact with the actual operation of the schools is most gratifying.

Under our system of government the school is peculiarly a public institution, in which all of our people are and should be personally interested, and we cannot emphasize too strongly the benefit derived by the school from the active participation of every one of our citizens in its affairs.

It is self evident that the teacher can accomplish far more with the pupil when she has the co-operation and support of the parent, and the very fact that the parent displays an interest in the progress of the work is an incentive for added effort on the part of the teacher.

The Parent-Teacher Associations are doing a great work in crystalizing and making more effective this public interest, and they deserve the cordial support of every parent of school children in the further development of the project.

Believing that the school should be, so far as possible, a community meeting place, and that the more often the public can be brought into contact with it, the greater will be the resulting benefit, the board, during the year, adopted a policy of granting the use of the high school assembly hall to local organizations for educational purposes, without charge, except for the necessary incidental janitor service connected therewith. We hope advantage will be taken of this opportunity and that frequent use may be made of the hall for such purposes.

Inasmuch as the board of school commissioners is the servant of the public, the board will always be glad to receive suggestions from any citizen regarding the administration of the schools and methods of increasing the efficiency thereof, and would suggest that regular meetings of the board are held in its room in the City Hall on the first Monday evening of every month. The meetings are public, and anyone who desires to attend will be welcome.

#### HIGH SCHOOL FIRE

On the evening of April 5th last there occurred what might have been a very disastrous fire at the high school building. Fortunately the assembly hall was in use on that evening and the fire was discovered just as the last of the audience was leaving the building. Through the prompt and effective work of the fire department, the fire, which had already gained considerable headway, was brought under control. Had it not been for the fact that the assembly hall was in use that night it is more than probable that the fire, which was chiefly in the partitions, would have gotton beyond control before it was discovered. The amount of damage to the building was submitted to arbitration and an award of \$3935.00 was made which the board felt was very fair. The damage to supplies was adjusted on the basis of our inventory at \$381.46. The total amount of insurance received was \$4,316.50.

Repairs essential to the continued occupancy of the building, and replacement of supplies, including the purchase of new fire hose and fire extinguishers, were made at an expense of \$1,292.40, leaving an unexpended balance, available to completely repair the damage to the building caused by the fire, of \$3,024.06.

#### INSURANCE ON SCHOOL PROPERTY

For some years, it has been apparent to the board that the school buildings were underinsured from the standpoint of sound business policy. It will be noted from the "Balance Sheet, as per City Treasurer's books as of December 31, 1922," appearing in the last city report, that the school buildings are carried on the books at \$238,000. In view of the tremendous increase in the cost of both labor and materials since our buildings were constructed, it is probably true that at the present time on a conservative estimate, the sound value of the school buildings is at least twice what it is carried at on the books. Prior to this year lack of funds available for increased premiums prevented the board from increasing the amount of insurance carried.

The total amount of insurance on school property, including contents, was \$114,400, which included \$10,000 additional placed on the Church Street school after the extensive repairs were made on that building in 1922.

The high school fire demonstrated very forcibly the inadequacy of protection from loss by fire, and, funds being
available by reason of the additional fifteen cent tax voted
at the last city election, the board has substantially increased
the insurance on our buildings. While the amount of insurance
now in force on buildings is not sufficient to cover anything
like a total loss, yet as the policies cover full loss to the extent
of insurance carried, it is believed that for any fire that might
reasonably be anticipated, we are fairly protected.

The initial cost of the additional insurance was \$935 and the average increased cost per year over a period of five years is about \$325.

Following is a statement showing the amount of insurance previously carried and the amount under the present schedule:

senedule:	The section 1	in cominal	Present	Schedule
Location of	Previousl Building	Contents	Building	Contents
Property	\$23,400	6,000	46,800	6,000
High School	20,800	2,160	31,600	2,000
Church St.	11,520	1,920	23,500	2,000

East Center St.	10,200	1,800	20,500	2,000
Total	\$96,280	\$18,120	\$183,600	\$18,000
1000		ously carried	Prese	nt schedule
Buildings		\$96,280	18	3,600
Contents		18,120	1	8,000
Total	\$	114,400	\$20	1,600

#### REPAIRS TO BUILDINGS

In addition to the ordinary repairs to school property, the board redecorated the interior of the Kingsley Building on Pine Street, installed electric lights and painted the woodwork on the exterior. The cost of the repairs to this building was \$1,787.16.

During the coming year the board hopes to be able to install additional heating facilities in the north rooms in the Lincoln building, which under existing conditions are uncomfortablely cold during extreme cold weather; and also to increase the heating apparatus at the Watkins Avenue school so as to heat the hall and the toilets in this building, which at present are without heat.

### HIGH SCHOOL

The lack of sufficient housing facilities at the high school becomes more and more deplorable. Our high school enrollment is steadily increasing and we not only are obliged to continue under the present unsatisfactory method of having double sessions, but following the opening of the fall term were obliged to furnish an additional teacher beyond what was contemplated would be required. Coming at a time when it was difficult to find a teacher available, suited to our requirements, the board was extremely fortunate in obtaining the services of Commissioner Harvey R. Kingsley, who very generously and courteously offered to take charge of these classes until a satisfactory teacher could be found to fill this position. Mr. Kingsley conducted his classes with marked ability throughout the first half year, and until we were able to find a suitable teacher to take over the work.

The determination of the question of what is to be done to relieve the situation at the high school is a problem which presents almost insurmountable difficulties. Whatever policy is determined upon we must take into consideration the future, and any makeshift plan would seem to be very unwise. On the other hand to meet the situation as it ought to be met, namely, by the construction of a new building, of sufficient size, and of a character appropriate for the purpose of housing and educating the present high school population, the seventh and eighth grades and leaving sufficient opportunity for future expansion, requires an expenditure which is considered by some to be beyond our bonding power. The board would welcome constructive suggestions from any and all who are interested in providing adequate facilities for our advanced students, to the end that some satisfactory disposition can be made of this most perplexing problem.

CITY OF RUTLAND

#### GRADE TEACHERS' SALARIES

The elementary and intermediate school teachers petitioned the board last fall for a readjustment upward of the salary schedule then in effect. A special committee of the board made a full investigation of the matter, met the committee representing the teachers and in its report recommended the adoption of a new schedule to go into effect on July 1, 1924, which was adopted by the board as follows:

Minimum Salary, \$1,000.

Salary for the school year 1924-1925 for teachers who have taught less than 10 years, \$1,000.

Salary for the school year 1924-1925 for teachers who have taught 10 or more years, \$1,150.

Annual increment, \$50.

Maximum salary, \$1,300.

This schedule compares favorably with salaries paid in the larger towns in the state, and not only recognizes the loyal and efficient service of our teachers, but places the board in a favorable position to compete with other schools in Vermont when a vacancy occurs.

#### SCHOOL SAVINGS

The savings banks installed in the various schools something over a year ago by the Rutland Savings Bank have now been in operation for a sufficient length of time to get some definite idea of the result from the standpoint of fostering habits of thrift in the pupils. Out of a population of 1540 in the grade schools where the machines were in use 731 pupils saved \$2,523.95 during the year 1923 by means of this method. Of the pupils not using the machines, the reports show that 535 were saving by some other method, making a total of 1266 pupils, or 83.5% saving by some means.

# The financial statement for the year follows:

#### RECEIPTS

D :	
Balance on hand, January 1, 1923	\$74 07
State rebate Superint	126 261 20
State rebate, Vocational G. Schools	2,000 00
State rebate Repaire	200.00
State rebate, Current For	300 00
State rebate	392 74
Insurance	1,000 00
Tuition	4,316 46
Books sold	5,571 00
Incidentals	2,700 73
	814 30
	\$143,630 68
	1-1-0

#### DISBURSEMENTS

Salarian 1999	
Salaries, 1923 Insurance, Printing and Advertising Repairs Supplies Text books furnished Text books sold Fuel, light and power Rent and furniture Sundries	1,902 28 3,822 72 5,119 29 3,422 15 2,448 21 11,378 14 241 60
Balance	1,413 06 \$135,175 20 8,455 48 \$143,630 68

The foregoing statement, however, does not portray accurately the actual situation with respect to the receipts and disbursements for school purposes, as it will be noted that under receipts is included the sum of \$4,316.46 received from insurance on account of the high school fire. Deducting

this from the total receipts would leave the actual receipts for school purposes \$139,314.22.

For the same reason the disbursement side of the account should be decreased by the amount of \$1,292.40 expended for repairs to the high school building, and replacement of supplies destroyed by the fire, which would leave the total disbursements for actual school purposes, \$133,882.80.

Inasmuch as the money which we received from the insurance on the high school building and contents represented a like amount of capital destroyed, or in other words, that the capital had been changed in form from physical property to money, the board considered that it had and has no right to expend such fund for the ordinary current operating expenses of the schools. Its views in this regard are confirmed by the City Attorney, who furnished the board an opinion to the effect that the money so received should not be used to pay current expenses, but should be held as a separate fund to be expended on the building and for supplies to replace the supplies destroyed.

It will be noted that there is unexpended in this fund the sum of \$3,024.06 with which to make such further repairs as may be necessary on account of the damage caused by the fire, the repairs already made having been only such as were necessary and essential to the further occupancy of the building.

The result is that instead of actually having a balance to carry over of \$8,455.48, as shown by the financial statement, the board in fact, will have \$5,431.42.

With this balance, the receipts from state rebates, tuitions and incidental items, and the amount realized from a school tax of one dollar, the same as voted last year, it is estimated that there will be available for the coming year about \$139,000. We estimate the necessary expenditures of the next year to be \$137,500, which makes it apparent that the extra fifteen cent tax in addition to the eighty-five cent tax allowed by the charter is imperative.

Therefore, we must request the voters again to authorize the additional fifteen cent tax, as voted last year, which will give the board an amount sufficient to effectively operate the schools throughout the coming year.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS, By WALTER S. FENTON.

Feb. 4, 1924.

President.

# Report of the Superintendent of Schools

To the Board of School Commissioners, the Mayor, City Council and Citizens of the City of Rutland:

I have the honor of submitting to you the thirty-first annual report of the Rutland City Schools and the third under

the present administration:

Every man and woman understands that he lives in a world far different from that known to Franklin, to Jefferson, or even to Lincoln. Means of transportation and communication have been multiplied and accelerated to such an extent that it is necessary to be world minded. Provincialism cannot live with the newspaper, the movie, the radio and the automobile. Political issues are involved and motives obscure. Even the road to heaven is pointed out by so many prophets

that, because of the abundance of direction, the way is lost. The founders of the American Republic recognized, right at the start, that a government founded on the idea of democracy could not long endure without an intelligent and educated citizenry. They set themselves the task, therefore, of providing suitable schools for all classes of people and made ample provision for their proper support. The success of the American people in their social, political and economic undertakings is due, in no small measure, to the wisdom of these early statesmen in providing proper facilities for education. Every true American rejoices in the phenomenal progress we have made as a united people and he entertains the belief that we have just made a beginning in our quest for social justice, individual economic independence and spiritual unfoldment. He desires to do his part for the advancement of our country and for amicable relations with all mankind.

It has been asserted that of all the institutions founded for the advancement of our people the school has been most cherished. There is an abundance of evidence to support such an assertion. The people are generous in the support of their schools and public spirited citizens are giving time and energy without price, in order that the community may make proper educational advancement. The children are placed in our care for many hours each week at a time in their lives when they are most responsive to influences that will shape their destiny. We teachers have a rare opportunity to serve humanity, to preserve the Republic and reap a reward in the hereafter. May we measure up to the trust placed in us and not be false to the ideals that actuate teachers at their best.

The school finds it necessary to aid in the preparation of our young folks for entrance into a life that is complex in the extreme. The child is compelled to learn to read with discrimination or be led astray by designing people. From a thousand books he learns to select the one that shall minister to his needs and make him a better citizen, a more ardent patriot, and a more zealous supporter of the home. The world is full of false economic doctrines. The school is doing its part to convince young people that wealth can only be created by work and that high rates of interest are a snare and a disappointment. It also instills in the mind of the rising generation the fundamental principle that common honesty demands a dollar's worth of service or goods for every dollar received. Educators assert without fear of successful contradiction that they understand the needs of the present and that they are shaping their courses of instruction and methods of procedure so that the children entrusted to them shall receive a maximum of sound instruction and suffer from a minimum of lost effort.

During the first year in school the children are taught a few fundamental ideas about citizenship. This early work has to do with the duties of the little ones in the home. in the school and on the street. Year by year the pupil's knowledge of civic affairs is built up, with more time devoted to the subject as they pass from grade to grade until, in the first year of the high school, five periods a week for a year are given this basal study. We attempt to make all the instruction in community life function by bringing it within the child's experience. Moreover, every child has from five to seven years of instruction in history. This furnishes a background for a proper interpretation of civic situations. Chief emphasis is properly placed on the history of our own country, but enough of universal history is given so that the child may later take his place as a world citizen as well as an enlightened patriot.

We claim a large degree of success in teaching how to read and what to read. Since the progress of the child in school and beyond is conditioned by his ability to comprehend printed material quickly, first emphasis is placed on silent reading. For two years or more we have undertaken to encourage the children to read good books during their spare time, using many devices to stimulate an interest. Several departments of the high school have definite requirements for outside reading which give the pupil a glimpse of the great field of literature. The co-operation of the Vermont State Library Association and the Rutland Public Library has aided in no small degree to bring about the present interest in home reading.

We also take justifiable pride in the advancement of our children in music, in drawing and in home economics. The public has come to recognize that there are many means of self expression and that these three departments minister to a real need in human lives. Many of the woes from which society suffers are traceable to improper home conditions; therefore, it is of paramount importance that all our young women be lead to understand the fine art of making the American home a delightful place. As we progress in civiliza-

tion and as leisure time increases, musical and artistic appreciation must fill what would otherwise be a desert place.

There is every evidence that the Rutland teachers are actuated by high ideals, by strict adherence to professional standards and by a zeal for hard work which makes the future bright with promise. The value of a teacher is only partly measured by her ability to teach the school subjects. For since she touches many young lives at a time when they receive lasting impressions, character and personality count for quite as much as scholarship. During the past two years the teachers of the city have made a careful study of several new phases of education. At the present time all the elementary and intermediate school teachers, working with committees of teachers from the high school, are engaged in the exacting task of preparing a syllabus which shall more fully meet the needs of the children under their care. Fifty-seven local teachers are now taking a university extension course of fifteen one hundred minute lectures under the direction of the University of Vermont.

The Parent-Teacher Associations have carried on the work so well begun in the years that are past. It is gratifying to note, from the reports of the presidents of these associations, that there is an increased membership and consequently a greater interest in the schools of the city. The physical and social needs of the children have received first consideration. Many valuable additions to the school property have been financed and at the present time money is being raised for school room libraries. I wish that every parent would join one of the associations and make a contribution of time and talent to the welfare of the schools.

A vast amount of foolish matter has been written of late about the waywardness of young people the world over. I desire to record my earnest conviction that moral standards were never higher, that intellectual growth was never more apparent and that self-reliance was never more in evidence. Our young folks are diligent, trustworthy and admirable with

just enough pep and ginger and natural human perversity to make them interesting.

We challenge any one to produce a record of school attendance which surpasses our own. Our attendance and health departments are so well managed that there is little chance to be out of school without legal reason and as a matter of fact, public opinion among the children is so strongly in favor of regular attendance that there is little inclination to be absent.

We plead guilty to many mistakes in the conduct of the schools, but we maintain that most of the mistakes we make are those commonly made by human beings. We claim no monopoly in the matter.

There is every reason to believe that the Public Schools of Rutland are making reasonable progress in spite of the fact that we are unable to organize properly our junior and senior high schools so as to meet modern needs. Our citizens have responded with enthusiasm to every appeal for additional financial support, our teachers are determined that education shall win in the "race against catastrophe" and all are placing a just valuation on the training of the youth of the land. The schools desire a continuation of the good will already shown and earnestly seek means to enlarge their capacity for service to the community.

Respectfully submitted,

W. W. FAIRCHILD,

Superintendent of Schools.

#### AGE GRADE TABLE—December 1, 1923.

The age grade table given below indicates that there is no serious over-age problem in grades one to four. In grades five and six there are forty-eight pupils who have reached such an age in their physical development that they ought not to be distributed in classes with much younger pupils. The three hundred pupils of normal age or under are placed under a handicap because of the presence of the forty-eight over-age pupils. Lack of adequate room in our schools prevents the proper segregation of these children.

Age	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	Total

### Report of Auditors

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools and Sinking Fund Commissioners from January 1, 1923 to December 31, 1923, inc., and find they have duly accounted for all monies received by them and that they have proper vouchers for all monies expended.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the City Treasurer's books. We have checked the cash and verified the notes, bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners, and found them to be correct.

The Treasurer's book shows a balance of uncollected taxes as follows:

1904-	7-8	-1	2	-1	3	-1	7	-7	18	-	19	)_	20	)							Į.					0	\$2,548	97
1921																			į.			4					2,143	76
1922																		÷		 . ,							991	01
1923																											2,625	42
																											\$8,309	16

The books and records of the City Treasurer's office are in excellent shape and very clearly show the city's true condition.

Respectfully submitted,

ROBERT D. SMITH, W. T. SIMONDS, H. A. COLBURN,

City Auditors.
